D. M. Ferry & Co's

WHOLESALE LIST

OF

SEEDS

FOR

1890

D. M. FERRY & Co.,

SEEDSMEN,

DETROIT, - MICHIGAN.

TO THE TRADE.

We herewith submit our **Annual Wholesale Price List of Seeds in Bulk for 1890**. We are from time to time extending our operations as Seed growers, and in the careful selection of our stock Seeds, the inspection and supervision of our growing crops, as well as in the care of our Seed crops when produced, to fit them for market, we are continually increasing and improving our facilities for supplying Seeds of a **Superior Quality**. Our Seed crops are very fine this season, both as to quantity and quality, verifying our former statements of the adaptability of the soil and climate of Michigan to seed growing. Those seeds not adapted to this State we have grown for us, as usual, from carefully selected Stocks, by experienced growers in different parts of the United States, Canada and Europe. All these crops are also carefully inspected by us, and samples from the stock Seeds used are planted and examined on our own trial grounds, while the crops themselves are being produced. Therefore, the stock we offer is **UNSURPASSED in quality**, and is far **SUPERIOR** to much that is offered by the **MANY ADVENTURERS IN THE SEED BUSINESS**, whose stock, of necessity, is picked up wherever it can be obtained cheapest, which fact precludes quality being to them a paramount consideration.

Our prices are as low as any Seeds of equal quality can be afforded. We again refer dealers to our motto, viz.: **THE BEST IS ALWAYS THE CHEAPEST**.

While we exercise the greatest care to supply every article true to name and of the very best quality, we wish it distinctly understood that the success of a crop is dependent upon so many contingencies, such as conditions of soil and climate, mode of planting, etc., that we cannot warrant our Seeds nor hold ourselves liable or responsible for any loss or damage arising from any failure thereof.

Proportionately higher prices will be charged for quantities less than $\frac{1}{4}$ lb. or $\frac{1}{4}$ bu. lots.

Where two qualities of any variety are quoted, the best will always be sent, unless specially otherwise ordered.

 Not bound by these prices for any definite time or quantity and subject to advance without notice.

TERMS CASH for orders for small amounts.

“ “ June 1, 1890, to regular customers, where orders amount to \$100, or a discount of one per cent. per month where payment is made before.

Field Peas, Clover, Hungarian, Millet, Timothy and all Grass Seeds, net cash, without any discount whatever.

CASH or satisfactory references must accompany orders from unknown correspondents.

DETROIT, January 10th, 1890.

 For Telegraphic Cipher Code, see inside last Cover Page.

MAMMOTH ROCK RED.

ALL SEASONS.

LATE, OR AUTUMN AND WINTER SORTS.

Mammoth Rock Red. This is by far the <i>largest and surest heading</i> Red Cabbage ever introduced. Ninety-eight per cent. of the plants will form extra fine heads, as large as Flat Dutch, as solid as Winnigstadt and of the deepest blood red color. Decidedly the best of the Red Cabbages.	Cambria.....	6 00

EARLY HALF LONG SCARLET,
STUMP ROOTED.

IMPROVED LONG ORANGE.

CARROT—Continued.

	Tel. Cipher.	Per Lb.
Long Orange.....	Chittenden..	30
Large White Vosges.....	Chilton.....	30
Large White Belgian.....	Choctaw.....	22

CAULIFLOWER—

	Tel. Cipher.	Per Oz.	Per Lb.
Ferry's Early Puritan, <i>novelty, the earliest, dwarfest and surest heading in cultivation. The best for forcing</i>	Clare.....	2 50	30 00
Early Snowball, <i>true. Our stock is unsurpassed</i>	Clallam.....	2 00	25 00
Extra Early Dwarf Erfurt, <i>finest strain</i>	Claiborne..	1 75	20 00

We have given a great deal of attention to the matter of securing an extra early, *sure heading*, large white Cauliflower, and think we have in our Puritan by far the best forcing and extra early variety in cultivation. Among all that we have grown, we have not found a single plant which did not produce a large fine head.

Compared with other first early sorts, the crop from Puritan is mostly in the market before we commence to cut heads from the others, while for density, evenness and purity of color, the heads are fully equal to the best of them. Per oz., \$2 50; per lb., \$30 00.

CAULIFLOWER—Continued.

	Tel. Cipher.	Per Oz.	Per Lb.
Extra Early Paris.....	Clatsop.....	50	5 00
Early Erfurt.....	Chowan.....	1 00	10 00
Early London.....	Clarion.....	30	3 00
Early Paris, or Nonpareil.....	Clarke.....	45	4 50
LeNormand's Short Stem, true.....	Clayton.....	75	7 50
Large Algiers.....	Cleveland.....	65	6 50
Veitch's Autumn Giant.....	Cloud.....	40	4 00

CELERY—

Golden Yellow Large Solid Celery.

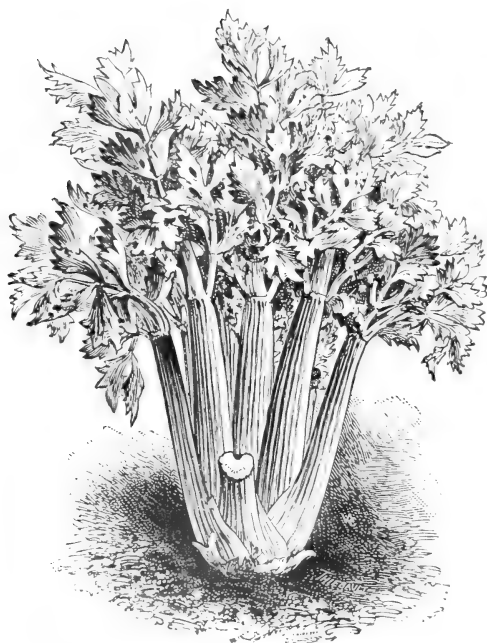

This is sometimes quoted as "Golden Self Blanching," and it is quite as self blanching as White Plume or any other kind. The entire plant is yellowish-green. As it approaches maturity the inner stems and leaves become a beautiful yellow, adding much to its beauty. It attains good size, and when well grown and blanched is the handsomest and choicest Celery in the market.

Per Lb., \$3.00.

GOLDEN YELLOW LARGE SOLID.

Golden Yellow, Large Solid, self blanching....	Cobb.....	3 00
White Plume.....	Cochise.....	2 00
Perfection Heartwell.....	Cochran.....	75
Golden Heart, or Golden Dwarf.....	Cooke.....	1 00

GIANT PASCAL.

GIANT PASCAL CELERY.

NEW, DISTINCT, INCOMPARABLY
THE BEST.

A Marked and Valuable Improvement, developed from the Golden Yellow Large Solid. It retains the Beautiful Color, the Thick, Solid, Crisp Stalks and the Incomparable Flavor of that variety, and in addition is much stronger growing and larger. It produces Perfectly Blanched Stalks over Two Feet in Length and proportionately thick, yet never in the least stringy. It is unequaled for Rich, Nutty Flavor. It blanches early and VERY EASILY. It is a Fine Keeper and decidedly the Best Shipper, retaining color and fresh appearance longer than any other. We believe this to be the Best All Round Celery in Existence, and hope all our customers will give it a trial. Order early as our stock is limited.

Per Lb., \$9.00.

CELERY—Continued.

	Tel. Cipher.	Per Lb.

Large Rooted, or Coffee.....	Conway.....	40
COLLARDS—		
Georgia Southern, or Creole, selected stock.....	Coos.....	60

CORN—CAUTION.—Sweet Corn in bulk, even after being thoroughly cured, will often gather moisture and spoil, particularly if it has been exposed to a low temperature. To prevent this it should be taken out of the bags as soon as received and spread in a dry place. Our quotations are per measured bushel, shelled. D. M. F. & Co

OPTIMUS.

ACME.

D. M. FERRY & CO'S OPTIMUS TOMATO.

A variety introduced by us, and, we believe, the best table tomato in existence. The vine is medium sized, vigorous and productive, bearing its fruit in clusters of five. Although not presented as a first early sort, many of our customers report that they have obtained ripe fruit from this as early as from any variety. The fruit is medium sized, oval, very smooth, and of exceedingly bright rich crimson-scarlet color; very free from cracks and rotting little. The flesh is of a crimson-scarlet color quite distinct from, and more beautiful than that of any other sort, and it is also the best in flavor and entirely free from the hard spots found in other large sorts. Per Lb., \$2.00.

HAND GARDEN IMPLEMENTS.

Our List is **COMPLETE**. It contains all the **Best Implements of all Makers**, and not a **Single Undesirable Tool**.

The "Planet Jr." Seed Drills and Cultivators.

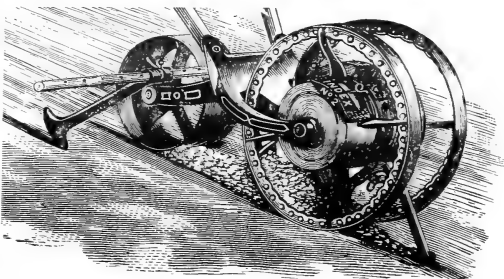

FOR PRICES SEE PAGE 30.

This most complete line of Tools is very popular, and deservedly so. They are reliable and very accurate, do not get out of order, and have been remodeled or greatly improved for the coming season's work.

THE "PLANET JR." NO. 2 SEED DRILL.

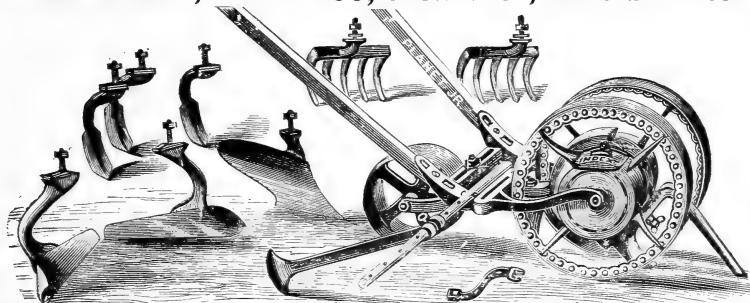

Sows all garden seeds accurately at any desired thickness or depth, opening, dropping, covering, rolling down and marking the next row all at one passage in the most perfect and reliable manner. It holds $2\frac{1}{2}$ quarts. It is remarkable for simplicity, strength and for ease and perfection of work in the field. No one having use for a Seed Drill can afford to buy any other. It is the best.

Truckers, market gardeners, onion growers and all who raise vegetables in quantity, should supply themselves also with the "Planet Jr." Double Wheel Hoe. (Described on page 30.)

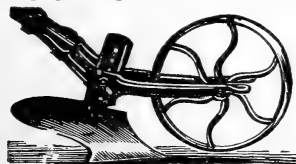

THE "PLANET JR."

Combined Drill, Wheel Hoe, Cultivator, Rake and Plow.

This tool is unrivaled in beauty of design, perfection of finish, convenience and capacity for work. It is suitable for either the farm or the garden. As a Seed Drill it is the same as the No. 2 (see description above), except in size. It holds one quart. For after care of the crop it is supplied with a pair of rakes, a pair of long hoes, three reversible cultivator teeth and a large garden plow. It is the best and most complete Combined Drill and Cultivator made.

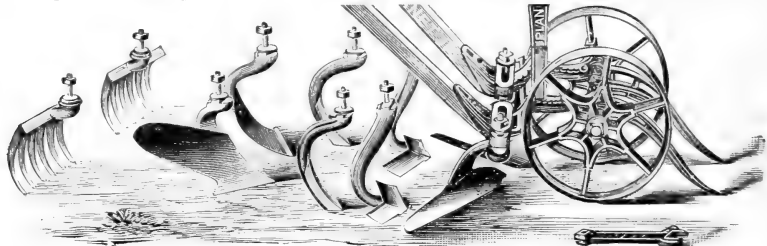

The 'Fire-Fly' Wheel Garden Plow

Makes the care of a vegetable garden a pleasure, and 10,000 families who could not find time to keep a garden, if attempting cultivation with the ordinary hand hoe, can raise their own vegetables successfully with the 'Fire-Fly.' It takes the place of the horse and plow, or cultivator, requiring no wide headlands to turn on, and is invaluable during all the gardening season.

THE "PLANET JR."

Double Wheel Hoe, Cultivator, Rake and Plow.

This very popular tool has been greatly simplified, strengthened and improved, and merits the thorough admiration of every practical gardener. Each tool is sent out with a pair of rakes, a pair of hoes, a pair of cultivator teeth, a pair of four-inch sweeps, and a pair of Plows.

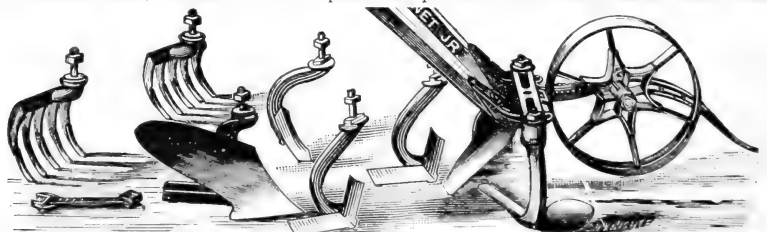

The wheels are adjustable in height, and the arch is 14 inches high. Leaf guards (detachable), go with each machine, to be used when plants extend into a wide row. This tool is light, very simple, made of the best material and highly finished, and nothing can exceed the perfection and variety of work it performs.

THE "PLANET JR." PLAIN DOUBLE WHEEL HOE.

To meet a demand from Onion Growers, and others who want a Hoe only, we offer the Double Wheel Hoe, just described, supplied simply with one pair of long curved point hoes. This tool has the same adjustment of hoes and wheel as the above, and any or all of the other attachments may be added to this at any time, and will be found to fit.

"PLANET JR." SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW.

Great strength, easy running, simple combinations, and variety of attachments are striking features of this favorite for the season of 1890. The full equipment is shown in the cut. All the blades are steel, hardened in oil, tempered and polished. The wheel has an extra broad

face, and is readily raised and lowered, and can be attached at one side of the frame so that one can cultivate both sides of a row of small plants at one passage. For the home vegetable garden its work is exactly what is needed for the easy cultivation of crops without the aid of a horse. Its lightness, strength and simplicity recommend it to all who examine it.

The "Fire-Fly" Single Wheel Hoe, Cultivator and Plow.

This popular implement has also been completely remodeled, and is greatly increased in strength and simplicity. The adjustment for depth is perfect, and, for the first time, it has been arranged to hoe both sides of a row at one passage, by attaching the wheel to one side of the main frame. It is similar in all respects to the "Planet Jr." Single Wheel Hoe just described, and does the same variety of work, *excepting it is not supplied with the new Rakes and Leaf Guard.*

Matthews' Garden Seed Drills and Cultivators.

MATTHEWS' GARDEN SEED DRILL.

We know of no hand Garden Drill, for sowing vegetable seeds, etc. which has met with more popularity than the Matthews' Garden Seed Drill among market gardeners everywhere.

It is designed for use in field and garden. When in operation it opens the furrow, drops the seed accurately at the desired depth, covers it and lightly rolls the earth down over it, and at the same time, marks the next row.

A valuable feature in this Drill is its patent INDICATOR, with names of different seeds on it, for adjusting the Drill to sow different kinds of seed, which is done by simply turning the Indicator until the name of the seed you want to sow comes to the top. No other drill is furnished with this ingenious device.

The drill is made of the best material throughout, and is complete in all its arrangements. **Price, boxed and delivered at Depot or Express Office, \$8.00.** (Tel. Cipher, Yates.)

MATTHEWS' IMPROVED DRILL AND CULTIVATOR COMBINED.

This machine is very efficient, either as a Drill or a Cultivator, and will be found to be adapted to any kind of soil. As a drill it possesses all the features of the Matthews' Garden Seed Drill of a smaller size. The Cultivator attachment has a set of teeth of an improved pattern, with STEEL BLADES of the best quality. **Price, boxed and delivered at Depot or Express Office, \$9.50.** (Tel. Cipher, Yazoo.)

Hoes with long Steel Blades, for use in exchange with the cultivator teeth. **Price, per pair, complete, delivered at Depot or Express Office, \$1.25.** (Tel. Cipher, Yaukton.)

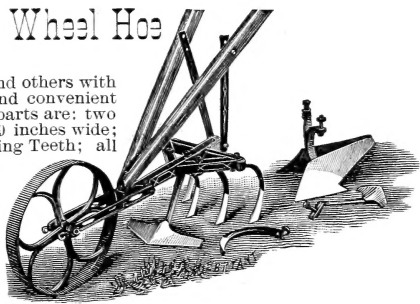

MATTHEWS' IMPROVED HAND CULTIVATOR.

This excellent machine is thoroughly constructed throughout, very durable and easy to operate. It spreads from six to fourteen inches, and will cut all the ground covered, even when spread to its greatest extent. The depth of the cultivation may be accurately gauged by raising or lowering the wheel, which is quickly done. It is now made with a large wheel and is also provided with a set of teeth of improved pattern, having STEEL BLADES of the best quality, and is perfectly adapted for use in any kind of soil. **Price, boxed and delivered at Depot or Express Office, \$4.50.** (Tel. Cipher, Yell.)

Hoes, with long Steel Blades, for use in exchange with the cultivator teeth. **Price per pair, complete, delivered at Depot or Express Office, \$1.25.** (Tel. Cipher, Yolo.)

Gem of the Garden Hand Wheel Hoe and Cultivator.

This implement is offered to gardeners and others with the assurance that it is the most effective and convenient tool of the kind yet invented. Its working parts are: two Scuffle or Cutting Blades, one $4\frac{1}{2}$ and one 9 inches wide; two Plows, right and left hand; five Stirring Teeth; all made of best steel. The wheel and handles of the "GEM" are both adjustable in height, while the frame is so slotted that the hoes, teeth and plows can be set in almost any position or angle. The hoes, of thin steel, and presenting nearly a straight line to the work, avoid the "dodging" so common to tools of this kind. **Price, boxed and delivered at Depot or Express Office, \$4.00.** (Tel. Cipher, York.)

THE WEED SLAYER.

In offering this tool we are confident from our experience with it that it is a very superior tool for use in the garden among onions, turnips, corn, potatoes, strawberries, etc., and for weeding among flowers and in gravel walks. It is light, weighing but 7 lbs.; strong, made of the best steel and iron; adjustable to any height of person, and cutting from one-half inch to one and one-half inches under ground and 7 inches wide. **Price, packed and delivered at Depot or Express Office, \$1.50 each.** (Tel. Cipher, Young.)

SEED BAGS.

No doubt most Seedsmen have experienced considerable difficulty (as we have) in obtaining ready-made bags suitable for Seed purposes. Most in the market are *machine made*, with more or less *imperfections*, and frequently made from *very weak and poor paper*.

The following are all *hand made*, and designed especially for *Seed purposes*. The larger sizes, from 1 pint upward, are made from the *best Manilla Paper*, and are graded in weight or thickness according to size of bag. The smaller sizes are made from the finest finished paper obtainable. **Samples of all sizes furnished on application. All unprinted.**

DETROIT, MICH.

NOTICE.

By making use of the following Telegraphic words for weights and measures, together with the Telegraphic Cipher attached to each article in this list, our customers will be able to order by wire at trifling expense. The Telegraphic words for QUANTITIES must always PRECEDE the cipher word for Seeds, and if the same quantity of several articles is needed, the word for that quantity should be placed before the word for the first article only. For example:—

FREIGHT, Righter, Kearney, Kossuth, Lehigh, means "Send by first freight Five Bushels each of Ferry's First and Best Selected, McLean's Little Gem and Champion of England Peas."

EXPRESS, Recanter, Broome, Burke, Carlton, means "Ship by first express Two Pounds each of Early Jersey Wakefield (true American), Early Winnigstadt and D. M. Ferry & Co's Premium Flat Dutch Cabbage."
